</

Setting Up the Feature

01

Navigate to Settings

Select the entity you want to track (e.g., Trips).

02

Create A Custom Field

Create a custom field named Email.

04

Read Only Setting

(Optional) Mark the field as Read-only to prevent edits.

03

Custom Field Type: Collection

Set the field type to Collection of Text.

Viewing Email History

- Ensure the custom column Emails is enabled and visible.
- Send an email from the system.
- The system automatically records:
 - The template used for the email.
 - The date the email was sent.

Process overview

Key Benefits

1 Transparency and Accountability

Provides clear visibility into all email communications, fostering trust and responsibility within teams.

2 Reliable Record Keeping

Maintains an accurate and dependable archive of all email correspondence associated with each entity for easy reference and retrieval.

3 Efficient Communication Tracking

Simplifies the process for teams to monitor email interactions automatically, eliminating the need for manual entry and reducing errors.
