

## LOB on Trailers

The system now allows users to capture Left on Board (LOB) quantities directly against trailers.

# Managing Left on Board Stock

The system now allows users to capture Left on Board (LOB) quantities directly against trailers.

- LOB refers to product that remains on a vehicle or trailer after a trip.
- This feature ensures that leftover stock is tracked, allocated, and used effectively

# Capturing LOB

01

## Select a trip

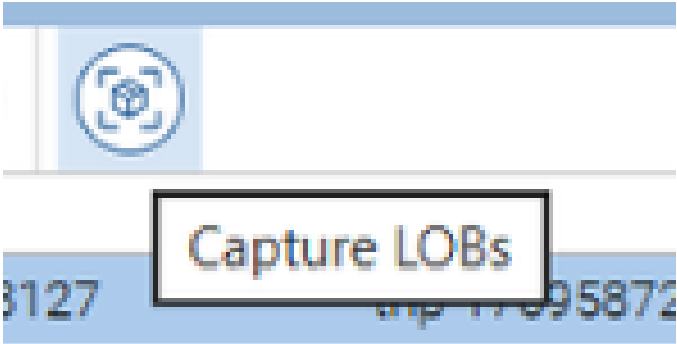

Choose a trip that has leftover product on board.

02

## Capture LOB

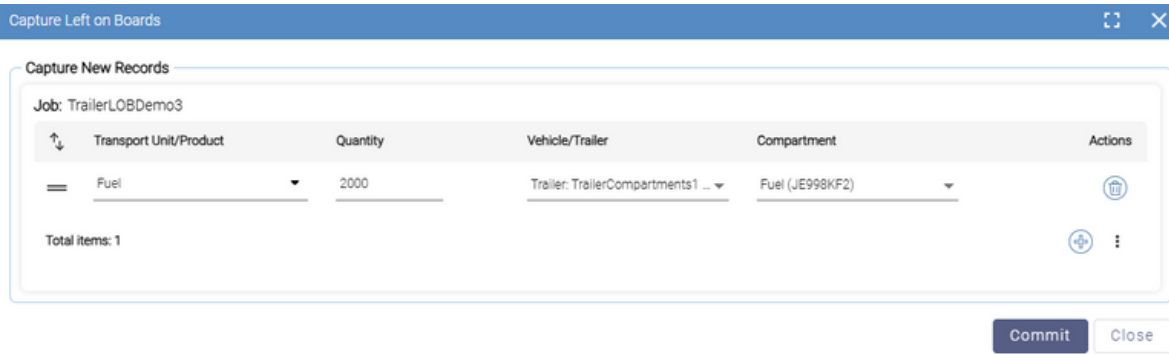

Tap the Capture LOB action button. A popup window will appear.

03

## Enter LOB Details

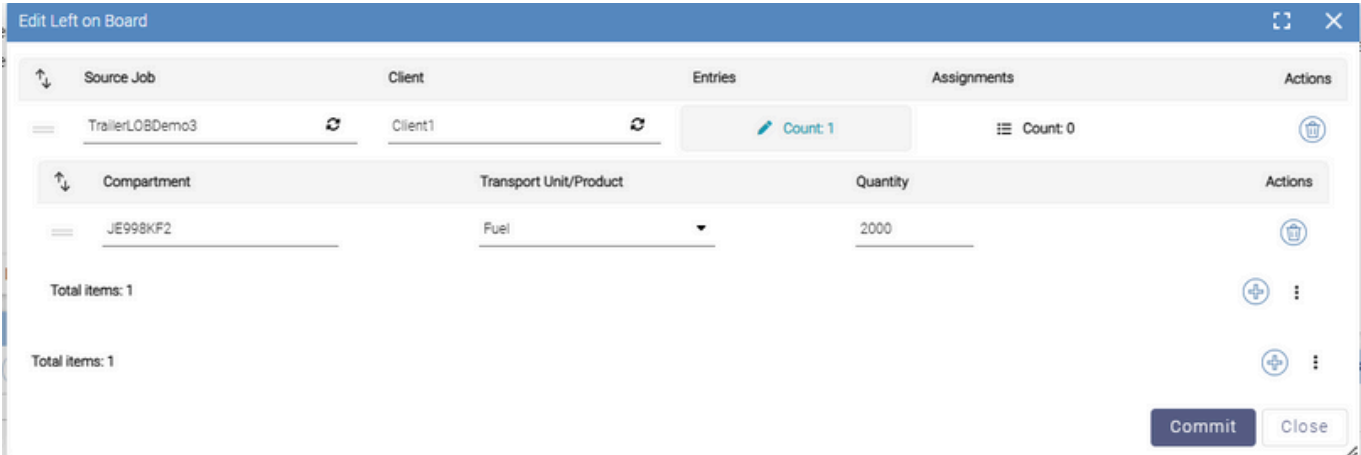

Specify the product type. Enter the quantity. Select the vehicle or trailer and compartment (if relevant) where the LOB is stored.

04

## Save and Review

Once saved, the LOB entry is linked to the resource (e.g., the trailer).

# Assigning LOB

01

## Allocate in Trip Builder

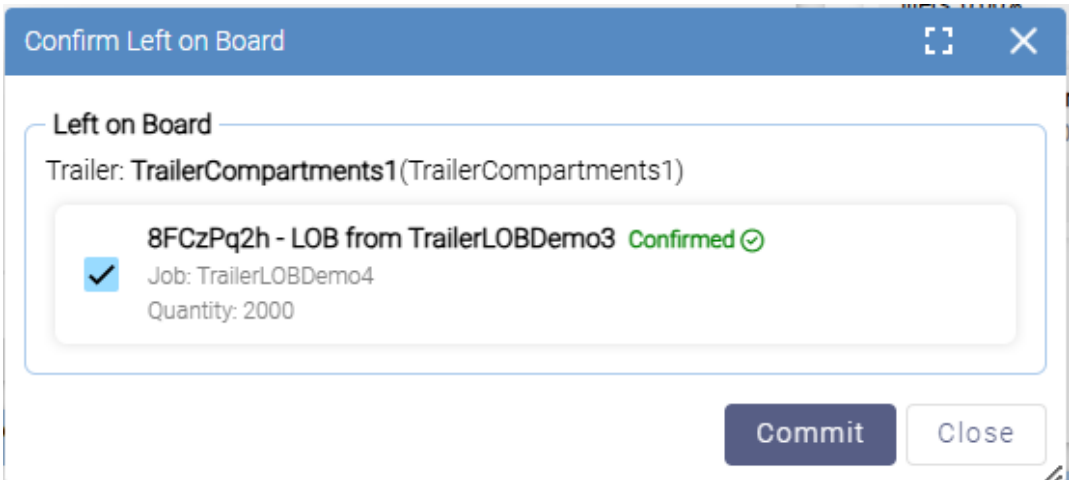

When assigning a trailer with existing LOB entries, the system prompts you to capture the job that the LOB will support.

03

## Confirm LOB on the Trips

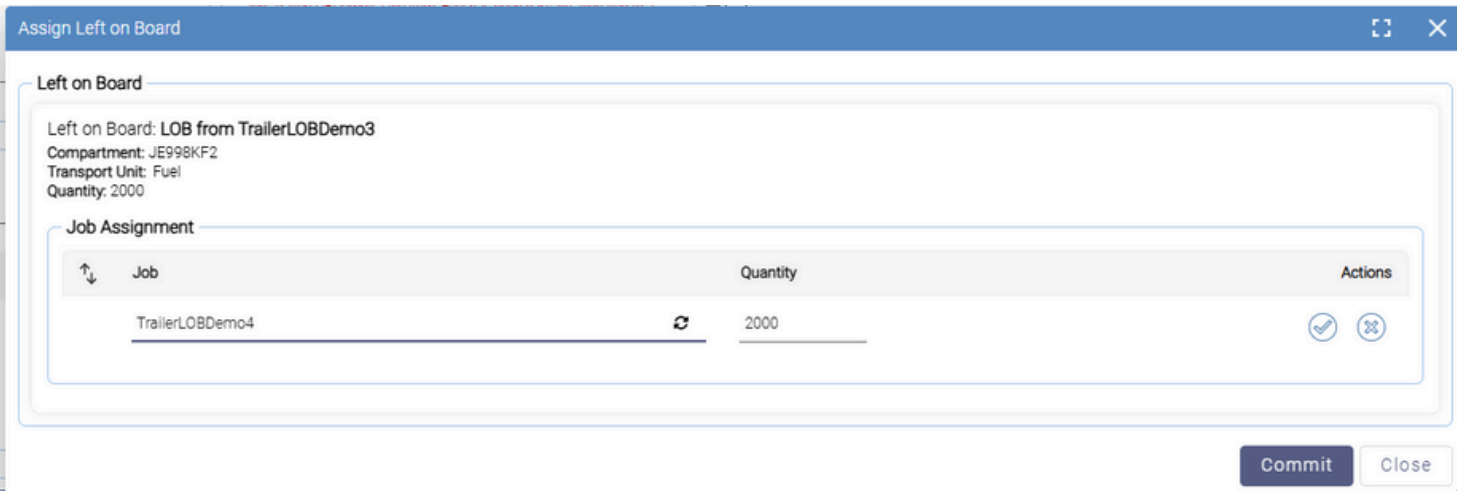

After confirmation, the LOB entry is removed from the trailer and applied to the trip.

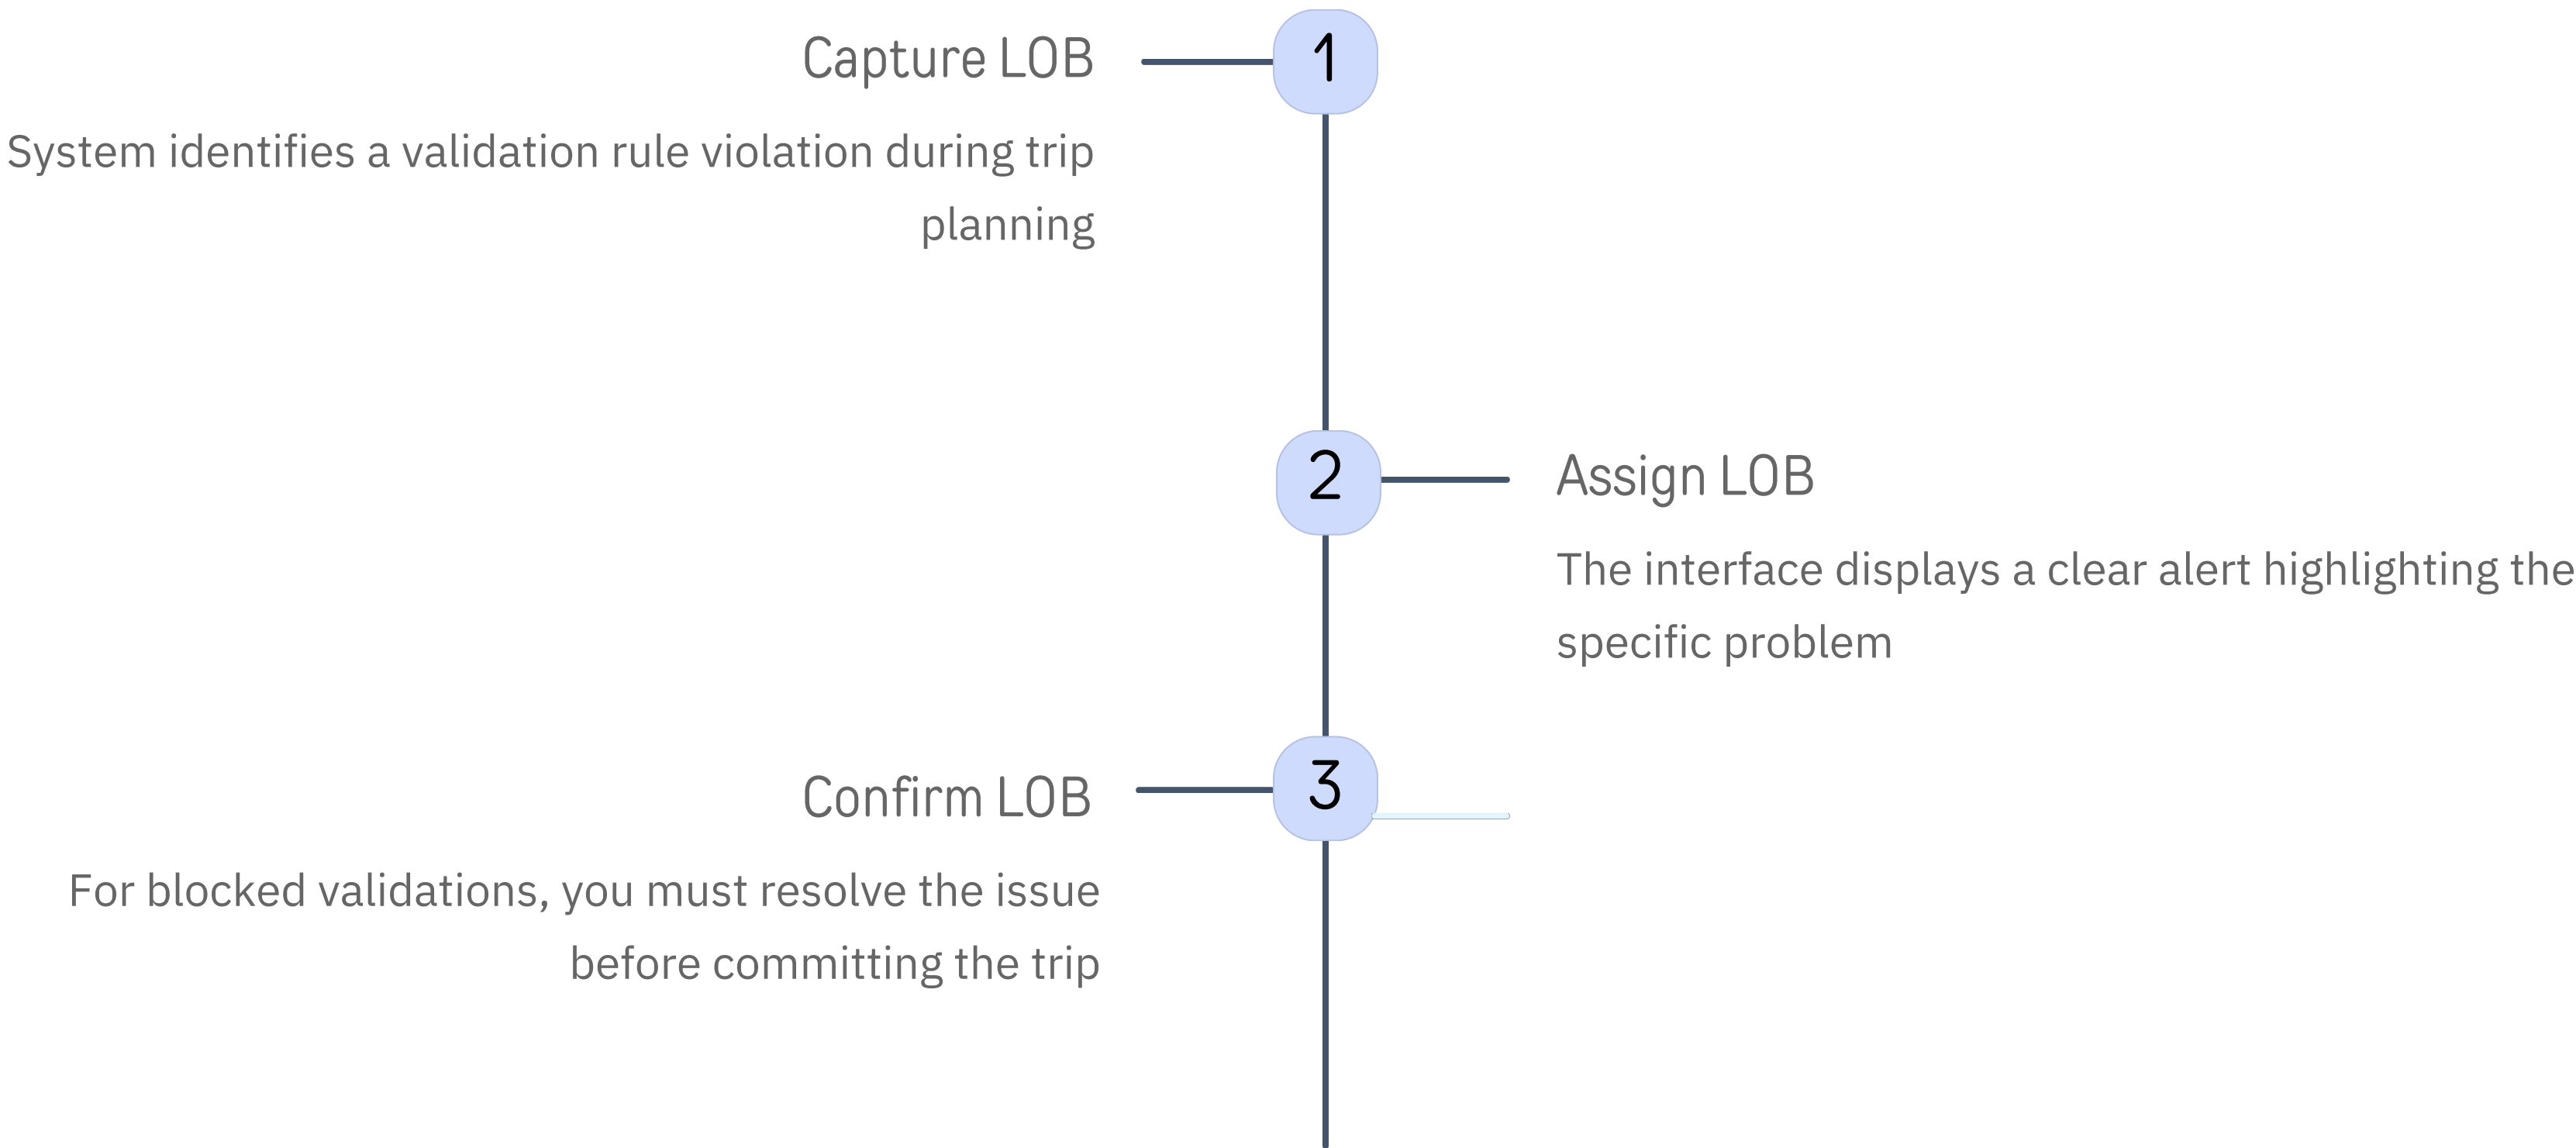

02

## Capture the job

Record the exact amount of product from the LOB that will be applied to the job.

# LOB Process

# Key Benefits

1

## Accuracy

Ensures leftover product is tracked and accounted for.

---

3

## Visibility

Provides clear records of what product is available and where.

---

2

## Efficiency

Reduces waste by reusing product already on board

---

4

## Streamlined Planning:

Simplifies trip allocation by linking LOB to new jobs.

---
